### **Testimonial Letter for TJC Construction**

In the fall of 2012 we purchased a home in Burlington on returning from an assignment in the U.S. When my wife and I saw this home we realized the layout was perfect for the two of us, other than the master bedroom ensuite and walk in closet were dated and small. We contracted TJC Construction to help us design and renovate the ensuite and convert a small second bedroom on the same floor into a walk in closet.

TJC Construction did a fabulous job of coordinating design and materials and ultimately multiple trades to transform this space from something we had as a concept, to a fantastic spa setting. The attention to detail and finish was second to none and even though we made several changes to the plan during the process they were always able to accommodate our interests and needs and made several key recommendations that resulted in the space being a showcase for our home.

Even today almost a year later we still find ourselves standing in the ensuite marveling over how well the rooms turned out and what incredible value the work TJC Construction added to our home. We cannot thank Tom and his team enough for the spectacular work they performed in making our house our home.
